

IKONIO

Designed for those who want more.

With the IKONIO, Teufel makes a bold statement in the world of streaming audio. The new flagship of the HOME series delivers exceptional Hi-Fi sound from a single system, with no compromises. Equipped with an impressive 650 watts RMS and two integrated 200 mm subwoofers in a sealed enclosure, this powerhouse delivers exceptionally precise, room-filling sound. A truly unique all-in-one system that combines state-of-the-art streaming with exceptional sound.

Berlin, 03. September 2026 – With the IKONIO, Teufel introduces its most powerful Wi-Fi speaker to date, built around an entirely new product concept. Rather than being a conventional successor or another model in the range, the IKONIO is a completely new design that combines the low-frequency performance of a dedicated subwoofer with a compact all-in-one format.

A meticulously engineered 3-way system forms the acoustic foundation: eight drivers and eight dedicated amplifier channels cover a broad frequency range, reaching down to 19 Hz (-6 dB). Thanks to the integrated Dynamore® Ultra technology, a single IKONIO disperses sound across three sides, filling the room with an impressively wide, natural soundstage that rivals a true stereo system.

Key features and specifications:

- **New product concept:** Combines powerful subwoofer performance with modern all-in-one streaming in a compact enclosure.
- **Active 3-way system:** Eight amplifier channels power an array of three tweeters, three midrange drivers and two subwoofers (650 watts RMS, 2,500 watts peak, up to 118 dB peak SPL).
- **Deep bass:** Two opposing 200 mm woofers in a sealed Force Balancing design reduce mechanical cabinet vibrations and enable frequency response down to 19 Hz (-6 dB).
- **Wireless stereo:** Two IKONIO speakers can be wirelessly paired as a stereo set (124 dB peak SPL in stereo mode).
- **Extensive connectivity:** Direct playback via AirPlay 2, Google Cast, Spotify Connect, TIDAL Connect, TuneIn internet radio and Bluetooth 5.1, as well as via RCA line-in and optical input.
- **Smart controls:** Touch control panel with automatic button illumination triggered by a proximity sensor, plus extended control via the Teufel Home app.
- **Compact, functional design:** Measuring just 30 × 38 × 30 cm and weighing 17.4 kg, the passively cooled enclosure delivers maximum performance from a minimal footprint. Removable covers; matching K&M stand available separately.

Form, function and acoustics in harmony

With the IKONIO, design and technology come together seamlessly. This entirely new audio concept combines maximum performance with a distinctive character, establishing a whole new class of speaker. Measuring just 30 × 30 cm at the base and 38 cm in height (weight: 17.4 kg), it fits elegantly into any living space while taking up minimal room. Its expressive, distinctive design makes a real visual statement, complemented by high-quality fabric covers for a refined finish. The IKONIO is also highly flexible when it comes to placement: use it on a TV stand or sideboard, or position it freely in the room with the optional K&M speaker stand.

The enclosure design also plays a key role in sound quality. The opposing Force Balancing arrangement of the two 200 mm woofers effectively cancels out mechanical vibrations, even at high volume levels. A digital signal processor (DSP) precisely controls the eight amplifier channels to reproduce even the finest nuances in your music. Thanks to an intelligently designed cooling system, the IKONIO operates completely without distracting fans.

The highest Hi-Fi standards meet years of development: Three sound modes for every listening situation

Years of development and deep acoustic expertise have gone into the IKONIO's sound performance. To deliver such immense power with precision in a compact form, Teufel combines an intelligently designed cooling system with uncompromising Hi-Fi standards. The proprietary Dynamore® Ultra technology offers three dedicated sound modes, allowing you to tailor the IKONIO's powerful sound to your room and listening situation:

- **Immersive mode:** Creates an impressively wide, layered soundstage. A single IKONIO sounds so spacious and detailed that it comes remarkably close to a true stereo system, while maintaining a natural, authentic sound with genuine Hi-Fi character.
- **Omnidirectional mode:** Turns the speaker into a 360-degree sound center, dispersing sound evenly in all directions. Ideal when the IKONIO is placed freely in the room and you move around: wherever you are, you enjoy the same precise sound quality and feel like you're right in the middle of the musicians.
- **Mono mode:** Dynamore® Ultra is deactivated in this mode, focusing the IKONIO's output directly forward. This direct sound projection meets traditional Hi-Fi standards while also providing the foundation for wireless stereo operation: in a two-speaker setup, the left IKONIO handles the left channel and the right IKONIO the right channel for razor-sharp stereo imaging.

Price & Availability

The IKONIO is available now in black or white for €1,199.99 from the Teufel online shop and all Teufel stores. The IKONIO will also be available as a stereo bundle.

About Lautsprecher Teufel

Teufel is Europe's largest direct-to-consumer audio brand. Its extensive range includes home cinema systems, TV sound solutions, multimedia systems, traditional Hi-Fi, headphones, Bluetooth speakers and multi-room speakers. The company began developing speaker kits in Berlin in 1979 and has since grown into a renowned consumer electronics brand across Europe. In addition to its German online shop, Teufel operates numerous European online shops, making its products available throughout Europe. Since July 2024, Teufel has also been present in the US, offering selected products in collaboration with Fender.

PRESS RELEASE

Since its foundation, great sound has always been at the heart of Teufel. Numerous awards from consumers, the press and online media demonstrate the brand's success. Teufel products are available exclusively from Teufel through its online shops, online marketplaces, customer hotline and Teufel brand stores.
