

## Audio at its Best

### Teufel's best headphones: the REAL BLUE PRO

**Over 40 hours of battery life, three-level noise control and the best in Teufel sound come together in the REAL BLUE PRO.**

Berlin, July 4th 2023 – Those who aim for the highest standards can brook no compromise. That's why we selected only the best technologies and components when designing the REAL BLUE PRO. The result is Teufel's best high-performance headphones to date, with well over 40 hours of battery life, three levels of Active Noise Canceling, Transparency Mode, and Teufel's very own Dynamore® Headphones for an extra-wide stereo panorama. It also comes equipped with Mimi Hearing Technologies' sound customization software, which can compensate for hearing loss.

#### Quick facts:

- high-end, closed, over-ear HD Bluetooth headphones with Active Noise Canceling (ANC)

- digital, hybrid Active Noise Canceling with three levels (low, medium, high)
- Transparency mode to let in outside noise
- lightweight 44-mm Linear HD drivers for extremely balanced dynamics with smooth, detailed trebles and low, dry bass suitable for High Resolution Audio
- toggleable Dynamore® Headphones for a wide stereo panorama to simulate listening to real speakers
- Bluetooth 5.1 with aptX™ Adaptive and AAC for HD music streaming from Spotify, Amazon Music, YouTube, Apple Music and more; perfectly synced video sound
- Battery life up to 44 hours with ANC, and 56 hours without
- Intuitive and programmable interface with buttons and touch-sensitive earcups
- high resolution microphone with digital noise reduction for crisp, clear phone calls and video conferences
- Mimi Sound Customization compensates for age-related hearing loss so users can hear more details in talk, music, and videos
- a wide array of additional features available in the Teufel Headphones App, including ShareMe to pair two REAL BLUE PROs with one smartphone, equalizer for audio control and Dynamore®, as well as programmable controls
- folding mechanism and rotating earcups so they pack flat for travel
- large, extra-soft, low-pressure earpads with memory foam
- optional cable with in-line controls allow headphones to be used in active or passive mode on empty battery
- comes with 3.5 mm cable with in-line controls, USB-A to USB-C charging cable, and sturdy travel box
- the REAL BLUE PRO is available now in Night Black and Titanium Gray at a price of 349.99 euros from the Teufel Webshop as well as all Teufel Stores

#### **Your sound - anytime, anywhere**

Uncompromising in performance and function. The REAL BLUE PRO is there to give you an audio boost in any situation - perfect for music, videos, gaming, podcasts, and audiobooks. Big 44 mm HD drivers deliver especially balanced audio with detailed trebles and deep, dry bass. The free Teufel Headphones App gives users additional audio customization options. Equalizer comes with presets for many music genres or talk, and allows you to save your own audio settings.

Since its 2017 debut, Teufel's very own Dynamore® Technology has appeared in numerous compact speaker systems. But this is the first time Teufel Audio has used it in headphones: Dynamore® Headphones widens the soundstage dramatically, simulating the experience of listening to real speakers. Dynamore® can be toggled on or off in the Teufel Headphones App.

Customize your sound even more with a Mimi hearing test. The Teufel Headphones App gives users the option to take a hearing test. It measures hearing in both ears separately. As we age, the ability to hear high frequencies in particular can start to fade. Mimi Hearing Technology uses data from this test to create a custom profile for each user to significantly improve the listening experience.

#### **Teufel's best ever noise control**

Digital Active Noise Canceling (ANC) gives you peace and quiet in three intensity levels. At maximum setting, ANC comes close to blocking out all environmental noise. ANC filters out annoying, clacking keyboards and loud coffee grinders in the office just as well as the monotone airplane turbines. Those who need to hear what's going on around them can also use Transparency Mode. Instead of filtering out external noise with antinoise, it boosts sounds from the environment so you won't even notice you're wearing headphones. That means you'll never miss your turn in the waiting room, or a platform change announcement at the train station.

#### **Perfect for everyday use**

One charge is enough for the REAL BLUE PRO to play at medium volume for over 44 hours with noise reduction turned on. And if you don't use ANC, they can last as long as 56 hours. But even a powerful battery can't do much if you forget to charge it. That's why we gave the REAL BLUE PRO a quick charge function. Just 15 minutes of charging can provide enough power for seven hours of listening. With rotating earcups and a folding mechanism, the headphones can lay flat in their sturdy, space-saving carrying case. Luxurious soft memory foam earpads guarantee maximum comfort. Body heat softens the foam so they quickly adapt to the shape of the wearer's head. And of course, the earpads can be replaced if they get damaged or worn out.

### **Intuitive and customizable controls**

The REAL BLUE PRO can be controlled using haptic buttons and touch-sensitive earcup surfaces. When the right hand grasps the earcups, the thumb lands automatically on the joystick, which controls volume, track skip, and play/pause. Right next to that, the thumb can easily move over to the ANC button. It can be used to switch between the three ANC modes as well as Transparency Mode. To make it easier to switch between your favorite modes, mode selection can be limited in the app. For example, if a user only ever switches between Transparency Mode and ANC level 3, they can remove ANC levels 1 and 2 to avoid having to skip past them every time.

The large surfaces on both earcups can also be programmed to recognize fingertip taps. Various functions for playback and hands-free modes can be assigned to either double or triple taps on the earcups. Available options include play/pause, track skip, accept/end phone call, as well as Dynamore® and Transparency Mode.

### **Price, parts, and availability**

Teufel's best ever headphones, the REAL BLUE PRO are available starting now at a price of 349.99 euros from the [Teufel Webshop](#) as well as all [Teufel Stores](#). Choose between two color options: Night Black and Titanium Gray. Headphones are packaged with a high-quality carrying case, a USB-A to USB-C charging cable, and a 3.5-mm audio cable with in-line controls.
