PRODUCT FEATURES

Compatible with multiple DJ applications

The DDJ-FLX2 works with various DJ applications including rekordbox and djay. After installing your preferred app on your mobile device, you can connect to the controller and start DJing right away. And if you want to learn more advanced techniques, you can use DJ software on your PC/Mac, including Serato DJ Lite.

serato DJ Lite

Compatible with various music streaming services

Each DJ application is compatible with different streaming services, so you can choose one based on the music and DJ style you want to play (subject to availability in your country). If you go for djay, you can access Apple Music, allowing you to choose from over 100 million tracks and incorporate your favorite music into your mixes.
Apple Music

Beatport Streaming

Beatsource Streaming

SoundCloud Go+/DJ

TIDAL

Smart CFX[1]

Recreate complex and dynamic effect techniques with a simple turn of knob. You can use Smart CFX for connecting tracks together and for adding emphasis to the music whenever you like.

Smart Fader[1]

Smart Fader automatically optimizes control of the volume, BPM, and bass – all you have to do is slide the crossfader in one direction. With this feature, you can easily mix tracks from different genres, even if they have vastly different tempos (BPM).

Lightweight and compact

The DDJ-FLX2 is AlphaTheta's lightest and most compact DJ controller, so, you can take it anywhere you want to play.

User-friendly features

With USB bus power, there's no need for an external power supply when you connect the unit to a PC/Mac or a mobile device[2] via USB Type-C. You can start DJing easily by playing music through the built-in speakers of your PC/Mac/mobile device, or you can plug speakers into the audio output terminals of the DDJ-FLX2.
