PRODUCT FEATURES

LARGE JOG WHEELS AND MAGVEL FADER

The DDJ-REV5 blends an authentic scratch experience with innovative features. The large jog wheels are responsive and reliable, and each include a display with playhead position. You can customize the Jog Feel, and the MAGVEL FADER is slick, robust, and ready to translate every tiny movement for precision scratching.

SCRATCH-STYLE LAYOUT

The long tempo sliders on the DDJ-REV5 run horizontally above the deck sections while the Performance Pads and Lever FX are placed in the mixer section for dynamic performances.

DEDICATED BUTTONS FOR EASY STEMS CONTROL

Easily create live mashups and remixes using the Stems buttons on the DDJ-REV5. Your tracks are split into different Stems within Serato DJ Pro or rekordbox – which you can play separately.

AUTO BPM TRANSITION

Mixing between musical genres with vastly different tempos is easy on the DDJ-REV5 thanks to Auto BPM Transition, which gradually changes the tempo of a track over a set number of beats to match the one you want to play next.

PIANO PLAY MODE

Just like Pitch Play, you can use the 16 Performance Pads to trigger a cue point in different semitones. But with Piano Play, the changes in pitch are arranged so the pads form a keyboard with the "white" keys on the bottom row and the "black" ones at the top, as if you're playing a piano.

MULTIPLE INPUTS AND OUTPUTS

A wide variety of inputs and outputs includes an XLR master out that's perfect for use in professional environments. And the 2 USB Type-C ports for PC/Mac make it easy to swap between DJs with a simple flick of a switch on the controller.
