Notice

The information in this document may change without prior notice and in no way constitutes any liability on the part of Lautsprecher Teufel GmbH. No part of these instructions may be reproduced in any form or be broadcast-

ed in any way electronically, mechanically, by photocopy or recording without the written permission of Lautsprecher Teufel GmbH.

© Lautsprecher Teufel GmbH Version 1.0 December 2011

Original packaging

If you wish to exercise your eight-week right of return, we ask that you be absolutely sure to hold onto the packaging. We can only accept the return of the speakers WITH THE ORIGINAL PACKAG-ING.

Empty boxes are not available!

Complaints

In case of complaint we will need the following information to process your enquiry:

1. Invoice number

Can be found on the sales slip (enclosed with the product) or on the order confirmation received as a PDF document, e.g. 4322543

2. Serial or lot number

Located on the bottom side of the unit, e.g. serial number: ITO4.... Many thanks for your support!

Contact

For questions, suggestions or criticism please contact our customer service department: Lautsprecher Teufel GmbH Gewerbehof Buelowbogen Buelowstrasse 66 10783 Berlin (Germany) Phone: 00800 - 200 300 40 (free of charge) Fax: +49 (0)30 / 300 930 930 E-mail: service@teufelaudio.com www.teufelaudio.com

Proper use

Only use the unit as described in these operating instructions. Any other use will be deemed as not in accordance with the instructions and may lead to damage of property or even persons.

The manufacturer accepts no liability for damage caused by use not in accordance with the instructions.

The product is intended for private use.

Before operating the unit for the first time, please read the safety notes and operating instructions

carefully. This is the only way to use all functions safely and reliably.

Keep the operating instructions safe and pass them on to anyone who may own the unit after you.

Safety notes

Caution icons

You will find the following caution icons in these instructions:

Danger High risk!

Failure to observe the warning may result in severe personal injury or death.

Attention Moderate risk!

Failure to observe the warning may result in property damage.

Minor risk!

Points which should be observed when handling the unit.

Safety notes

Danger Risk of electric shock!

Faulty installation of electrical equipment or mains voltage which is too high can cause electric shocks.

- The device is suitable for use with a power supply voltage of 230 V~/50 Hz.
- If the unit's case or mains cable is defective or shows other signs of visible damage, disconnect the mains adapter immediately from the socket and do not operate the device.
- If the unit emits smoke or smells of burning or other unusual odours, disconnect it immediately from the power supply and do not operate it.
- The On/Standby button does not disconnect the unit from the grid. Set up the unit so that the mains plug is easily accessible.

- Never open the device casing. Repairs may only be carried out by an authorised specialist workshop. Only parts which conform with the original device specifications may be used for repairs. This device contains electrical and mechanical parts that are imperative for providing protection against sources of danger.
- Only use the accessory products specified by the manufacturer.
- Do not insert any objects through the openings in the housing.
- Only use the unit in indoor areas.
- Do not operate the unit in damp areas and protect it from drops of water or splash water.

Also take care not to stand vases or other containers filled with liquid on or near the unit in order to avoid liquid getting into the housing. If water or other foreign bodies should enter the unit, immediately disconnect the power plug. Then send the device in to our service address.

- Never touch the mains adapter with damp hands.
- Check the device and power cord for damages on a regular basis.

Danger Danger to children!

Children can become trapped in the packing film when play-

ing and suffocate.

- Do not allow children to play with the unit or the packing film. Danger of suffocation.
- Never allow children to operate electrical devices unsupervised.

Danger to hearing!

Loud noise may lead to hearing loss.

There is a potential risk of sudden very high noise pressure especially when activating the device which is set to full volume. This may have psychological consequences and also cause physical injury. Children and pets are particularly at risk.

- Set your signal source unit volume control to a low setting.
- When the volume is set high, always keep a certain distance from the unit and never place your ear directly on the speaker.
- To avoid damage to health, avoid extended listening at high volume.

Danger Danger of injury/ damage!

Incorrect location may result in

damage.

- Never use the unit unmounted in vehicles, in unstable locations, on wobbly tripods or furniture, on underdimensioned brackets etc. The device could tip or fall down and cause injury to persons or be damaged itself.
- Arrange the unit so that it cannot be knocked over accidentally and make sure that the power cord does not pose a trip hazard.
- Do not place the unit near sources of heat (e.g. heaters, ovens, other heat generating equipment such as amplifiers etc.).

Attention Fire hazard!

Improper use may lead to damage or fire.

- Do not place open flames such as burning candles or similar on the unit.
- Do not place the unit in direct sunlight.
- Ensure sufficient ventilation.
- Do not cover the vents with curtains, blankets, newspapers or similar. Heat build-up inside the unit can shorten its lifetime.

Attention Risk of damage!

Power overload due to lightning strike may damage or destroy the unit.

 If the unit is to be left unsupervised for a long period (e.g. during a holiday), or if a thunderstorm is forecast, disconnect the power plug from the power socket.

Product contents

Check to be sure

- Check that all items have been delivered and that nothing is damaged:
 - 1 x iTeufel® Air
 - 1 x power cord
- If the delivery is incomplete or exhibits transport damage, please contact our service department (see page 3).
- Do not operate the unit in the event of transport damage!

(1)

(2)

Setup and connection

Setup location

- Select a stable, level base.
- Make sure that the environment is clean and free from dust.
- Avoid placing the unit close to sources of heat or in direct sunlight.
- Lay the power cord so that it does not pose a trip hazard.
- Do not place any heavy objects on top of the power cord or the unit.

Connecting to a power supply

- 1. Insert the power cord's small plug in the jack **4**.
- 2. Insert the power plug in an easily accessible mains socket.

The power LED **8** is illuminated in red indicating that the device is in standby.

Connecting the iTeufel® Air

To playback the sound of your device with AirPort-function via your iTeufel® Air, you have to connect the devices with each other.

For direct connection (option 1) just log into the iTeufel® Air WLAN network using the AirPort-function. However, you will lose access to your home WLAN network then.

If you would like to maintain this access, you will have to connect the iTeufel® Air with your WLAN router (option 2).

Option 1 - Direct connection

Prerequisite:

- Your iTeufel[®] Air is currently in standby (power LED 8 is illuminated in red).
- Your computer is not connected via a LAN cable.
- 1. Push and hold the On/Standby button \circlearrowright 1 until the power LED 8 starts to flash blue.
- If the flash sequence of the power LED
 8 slows down after a while, push and hold the Setup 7 button until the power LED 8 flashes blue and orange in sequence.

Your iTeufel[®] Air will now transmit in the same manner as an open Wi-Fi network.

 Access "Settings" on your iPad for example:

- 4. Tap the menu item Wi-Fi. After a few seconds, you will also find the Wi-Fi network of your iTeufel[®] Air under the Wi-Fi networks.
- 5. Select the "iTeufel Air" Wi-Fi network.
- 6. Launch a playback program on your iPad, e.g. 📑 iPod.

Danger to hearing!

Set the volume to the lowest level on your playback device or in iTunes. Otherwise, playback via the iTeufel® Air may be extremely loud.

 Tap on the Airplay button and select "iTeufel Air".
 All sound will now be emitted from your iTeufel[®] Air.

Option 2 - Connection via a WLAN router

You must perform one-time registration of your iTeufel® Air on your WLAN router when using it for the first time.

Registration with WPS

If your WLAN router has a WPS function, proceed as follows:

Prerequisite:

- Your iTeufel[®] Air is currently in standby (power LED 8 is illuminated in red).
- Your computer is not connected via a LAN cable.
- 1. Push and hold the On/Standby button \circlearrowright 1 until the power LED 8 starts to flash blue.
- Activate the WPS function on your WLAN router (see operating instructions for the router).
- 3. If the power LED **8** flash sequence slows down after some time, briefly push the **Setup 7** button.

The connection will now be established automatically.

After some time (up to 2 minutes), the power LED **8** will be permanently illuminated in blue indicating that the connection has been established.

Registration without WPS

If your WLAN router does not have a WPS function, proceed as follows:

Prerequisite: Your iTeufel® Air is currently in standby (power LED 8 is illuminated in red)

- 1. Push and hold the On/Standby button \circlearrowright 1 until the power LED 8 starts to flash blue.
- If the flash sequence of the power LED
 8 slows down after a while, push and hold the Setup 7 button until the power LED 8 flashes blue and orange in sequence.
- On the next pages you will find some examples describing how to establish a connection with different operating systems.
 - a. iPad, iPhone or iPod touch
 - b. iMac, Macbook Air or Mac Pro
 - c. PC with Windows 7
 - d. PC with Windows Vista
 - e. PC with Windows XP.

a) Registration without WPS using an iPad, iPhone or iPod touch

1. Connect the devices as described on page 8, chapter "Option 1 - Direct connection".

b) Registration without WPS using a MacBook

1. Open the "System Preferences...".

2. Click "Network".

0 0	Network

Setting up the iTeufel® Air

Once the WLAN connection between your iTeufel® Air and your computer has been established, open your browser (e.g. Safari) and enter the IP address of the iTeufel® Air in the address line:

192.168.1.1

The window displayed here should now be visible.

4. You have successfully set up and connected your iTeufel® Air. You have also reestablished the connection to your home WLAN network. The power LED **8** will be continuously illuminated in blue.

Sound output

After the connection between your iTeufel® Air and your WLAN router has been established, you can playback sound from your iPad, iPhone, iPod touch or from iTunes via the iTeufel® Air.

Danger to hearing!

Set the volume to the lowest level on your playback device or in iTunes. Otherwise, playback via the iTeufel® Air may be extremely loud.

1. Launch a playback program on your iPad, iPhone, iPod touch, e.g. 🐻 iPod.

2. Tap on the Airplay button and select "iTeufel Air".

All sounds will now be emitted via your iTeufel[®] Air.

Activation/sleep and standby mode

- Activation:
 - From sleep mode (power LED is illuminated in orange): Briefly push the On/Standby but-

ton 🖰 **1**.

If your iTeufel[®] Air is already registered with your WLAN router, the connection will be immediately established, the power LED **8** will be illuminated in blue.

 From standby mode (power LED is illuminated in red):

Push and hold the On/Standby button 🖰 1 until the power LED 8 flashes blue.

The connection will be established automatically if your iTeufel is already registered with your WLAN router. This may take up to 2 minutes. The connection has been established once the power LED 8 is continuously illuminated in blue.

• Switching to sleep mode:

 Close the application (e.g. iTunes), then briefly push the On/Standby button 🖰 1.

The power LED 8 will be illuminated in orange in sleep mode. If the device does not receive any signal for 20 minutes, it will automat-

- ically switch to sleep mode. • Switching to standby mode:
 - Push and hold the On/Standby button 🖰 1 until the power LED **8** is illuminated in red.

Audio input

You can connect almost any audio source, i.e. computers, MP3 players (with/without dock), game consoles, televisions etc., to the 3.5 mm jack plug **Line In 5**. The source device only requires an output with a line level. Such outputs are configured either as stereo RCA jacks or as 3.5 mm jack plug. You connect these devices to the jack **Line In 5** with a suitable connector cable.

You can purchase connector cables in our webshop in the "Accessories" area.

Once the iTeufel® Air is activated, playback begins automatically after a few seconds.

Please note that music played via the stream has priority over line input.

Volume

The volume buttons **2** and **3** are only active if you enabled the option "Allow iTunes audio control from remote speakers" (see next page) or have connected an external player to the input jack **Line In 5** with a cable.

Otherwise, set the volume on your iPad, iPhone, iPod touch or via iTunes.

Power LED

The power LED **8** signals have the following meaning.

Power LED	Meaning
illuminates in blue	connection with the WLAN router estab- lished
flashes blue	network connection can be established
flashes blue quickly	initialisation
flashes blue slowly	connection with WPS is being established
flashes blue/or- ange	connection without WPS is being estab- lished
flashes orange	network problem
flashes red	critical firmware prob- lem
illuminates red	standby mode
illuminates or- ange	sleep mode

iTunes setting

 In iTunes, activate the option "Allow iTunes audio control from remote speakers" under "Preferences/Devices". Thus, you can also adjust the volume with the buttons 2 and 3 on the iTeufel[®] Air.

Using multiple iTeufel® Air speakers

• You can connect additional iTeufel® Air speakers to WLAN wireless router. You can then set up these speakers e.g. in different rooms in your home and control them individually using the Airplay button.

Input priorities

Please note that music played via the stream has priority over line input. If no music is being emitted via the stream, then **Line Input 5** is active.

Reset

To reset your iTeufel[®] Air to the factory default settings, push the reset button
 b using a thin object, e.g. a paper clip formed into a long wire.

Care and cleaning

Clean the device regularly with a soft, damp microfibre cloth. Please be absolutely sure to observe the following notes in the process:

Danger Risk of electric shock!

In contact with live parts, water can lead to electric shock or

short circuit.

- Ensure that no liquid penetrates the unit.
- Before cleaning the device, disconnect the power plug from the socket.

Attention Risk of damage!

The wrong cleaner could damage the sensitive case surface.

- If possible, only use plain water without any additives. A mild soapy solution is suitable for removing stubborn stains.
- Do not in any case use aggressive cleaning agents, spirit, thinner, petrol or the like for cleaning.

Protecting the environment

Disposal of the unit

Used units must not be disposed of with household waste!

If the unit is no longer operational, every consumer is re-

quired by law to dispose of used devices separately from household waste, e.g. at a collection point run by the communal authority borough. In this way it is ensured, that used devices are properly recycled and that negative consequences on the environment are avoided. For this reason, electrical equipment is labelled with the symbol shown here.

Troubleshooting

The following advice should help you to solve problems. If this doesn't work, the extensive FAQs on our website will surely provide you with support. Otherwise, please contact our hotline (see page 3). Take note of the warranty instructions.

Problem	Possible cause	Solution
Device does not work, control LED is dark.	No power supply.	Check the correct placement of the power cord.
		Check the function of the socket with another device.
WLAN connection can not be established.	Your computer is connected to the router via LAN cable.	Disconnect the LAN cable con- nection.
No sound.	No connection.	Establish a connection (see pages 8, 9).
	iTeufel® Air not set as the output device.	Select the iTeufel® Air as the output device using the Airplay button (see page 23).
Sound can not be transmitted via cable.	iTeufel® Air also receives an AirPlay stream. This stream takes precedence over the Line Input.	Deactivate the AirPlay stream.
	Volume of the playback pro- gramme is set to zero.	Increase the volume, e.g. in iTunes.
Volume buttons on the device do not respond.	iTunes is set incorrectly.	Enable the iTunes option "Allow iTunes audio control from re- mote speakers" (see page 25).
